Dear Parents and Students,

We started student and staff serial COVID-19 testing on Monday, September 27th. Currently, there are over 600 schools in Colorado participating. Many parents and students are worried that this testing has the potential to close our schools. However, the serial COVID-19 testing is, in fact, designed to keep schools open. Testing is for both symptomatic and asymptomatic persons. Our school chose to perform tests on Monday mornings as a means to discover positive COVID-19 cases before they are shared in school. Since the school has 3-day weekends and most cases come from outside school activities, Mancos School District tests on Mondays as a strategic measure to limit exposure in the school. For those who test weekly and/or are vaccinated, this person will not have to be quarantined if in significant contact with a positive case. Also, no student will be tested without parental consent.

This is a VOLUNTEER program. If you wish to have your student participate, please use the following links to register your student(s) depending on which school they are in. Students can test ***every Monday or any Monday*** *as long as they are signed up with* ***an online signed permission slip.*** *In addition, we have ordered home kits for one-off testing at home on your own. Please ask Nurse Martinez for home kits for students or parents.*

Thank you for making Mancos confident in our healthy environment.
